

**INDEX TO 1871 CENSUS OF HANTS COUNTY
NOVA SCOTIA CANADA
(A-K)**

**Leland H. Harvie
22 Oct 1988**

NOTES AND COMMENTS

This is an index to the 1871 Census of Canada District No. 188 (Hants Co. Nova Scotia). The original schedules contain more information concerning each individual; place of birth, religion, origin, occupation, marital status, schooling and should be consulted in every case.

This document is available on microfilm loan at any Family History Centre operated by The Church of Jesus Christ of Latter-day Saints worldwide. The film number is FHL 1685463.

A total of 21,555 names are included and they are arranged alphabetically by last name, first name and age. The top 30 surnames by frequency are listed below.

Notes and Comments (cont.)

The county is divided into 18 sub districts. For ease of use the name of the sub district as well as the code number was printed for each individual so that it would not be necessary to refer to a table.

CODE	SUB DISTRICT
al	Scotch Village Div. 1
a2	Scotch Village Div. 2
b	Kempt
c	Walton
dl	Noel Div. 1
d2	Noel Div. 2
el	Maitland Div. 1
e2	Maitland Div. 2
f	Shubenacadie
g	Nine Mile River
h	Rawdon North
i	Rawdon South
j	Brooklyn
k	St. Croix
l1	Windsor Div. 1
l2	Windsor Div. 2
m	Falmouth
n	Windsor Forks

The Dwelling and Family numbers run consecutively within each division. For the few cases where a family was living in a shanty rather than a dwelling, the last dwelling number was carried forward for ease of locating the family within the division.

If the dwelling number and the family number are both zero, this indicates that the name was found on a separate schedule, the nominal return of the dead. A list of those who had died within the last twelve months appears on the microfilm reel immediately following the last family for each division.

When the age is given as 0 years, this indicates a child less than one year old. On the original schedule (which must be consulted) the age of the child is usually given in months at the time the census was taken. The month in which the child was born is often given as well.
e.g. 6/12 mo. (Oct)

Notes and Comments (cont.)

Abbreviations such as Ja's., Alex'r, and Wm. were entered in full as James, Alexander and William so that they would be sorted correctly by age. For consistency, Mary was entered when the name was originally recorded as Mary Jane or Mary Ann in two parts.

The index contains errors due mainly to three problems:

1. The name was recorded incorrectly in the original.
2. The handwriting was partly illegible.
3. The entry was copied or entered incorrectly before sorting.

If a name is not immediately found in the index, consideration should be given to spelling variations and likely errors. For example the capital letters S, L, and T when written are often difficult to distinguish as are the letters I and J. In fact, to avoid errors no middle initials were included in the index. The small letters i and e, r and n, or l and t are also troublesome. The census return for St. Croix is unrivaled both for poor penmanship and eccentric spelling.

No corrections were attempted for spelling irregularities. One example is Priscilla. Variations include Prescilia, Precilla, Percilla, Prissillia and Pricilla. Another example is Swinamer spelled Sweinhammar, Sweinhammer, Swenehamer, Swinehammer, Swinhamer, and Swinhammer.

When searching for a given surname these variations must be kept in mind.

One last note made by John Burgess the enumerator for Scotch Village and recorded in the margin of his last schedule on 1 May 1871.

“Schedules Distributed 280
