## Hantsport Riverbank Cemetery Survey 1995

### INTRODUCTION:

This work is organized in three parts. The first part is an alphabetical listing of names and a finding aid for locating the headstone. The date of death is recorded (if given) as well as an age which may be "calculated" in the case of stones where a year of birth or a full birth date is given.

The reason for this format is that the information was extracted for a separate project, The Hantsport Genealogical Index, which is a finding aid to original sources for family research and includes many different types of records. The original must always be consulted for additional details.

The second part is an updated series of plans for locating the individual stones which have been assigned numbers in eleven different sections. This is a continuation of a survey done in 1973 and rechecked in 1979 by Allen Robertson. That was a record of headstones dated 1930 and earlier although all stones existing at the time were numbered.

The names from all the stones including those dated after 1930, as well as the names from additional stones in the original eight sections, and from all the stones in the three new sections have been included in the present survey.

The third part is a copy of the 1979 survey which may include a more detailed extraction of the inscription from those stones dated prior to 1930. It is arranged alphabetically by section.

I would like to thank John-Paul Doucette who carried out this work for the Society in the summer of 1995.

### COVER

The cover depicts the "New Entrance Gates to Riverside Cemetery, Hantsport" taken from an article which appeared in 'The Hants Journal' on September 9th, 1909. The text follows:

[Quote]

We are glad to be able to present to our readers in this issue a cut of the handsome gates which now adorn the entrance of the Riverside Cemetery at Hantsport - the gift of John W. Churchill, Esq., of that town. When in Hantsport a few days ago the editor of the 'Journal' saw this very handsome piece of work, which is a credit to all connected with it. The whole width is 33½ feet; and the height, including the finals, 19 feet. The two main posts or columns which support the whole structure are of southern red pine, 16 inches square.

They were made from the mainmast of the brigantine Genoa, owned by E. Churchill and Sons. After the vessel was dismantled the masts lay in the salt water for years, which helped to preserve them. After being cut to the size required they were well coated at different times with creosote. When ready the posts were put in place at a depth of seven feet, and embedded in concrete to make a solid job. The main opening or carriage way is 15 feet wide, the height from the road bed to the cross bar under the main arch, 9 feet. The side gates or openings are five feet wide. The whole structure is held together with iron bars passing through the posts under the cross bars. All the turned work was done by Mr. Terry Folker of Hantsport, from patterns prepared by the builder Mr. Rod Mitchener. The domes that cap the posts were made by Mr. A. W. Pattison, from galvanized iron. All the hinges and spring catches were made by Mr. R. Comstock.

The painting is an imitation of red and grey granite with sandstone bases and the gates in bronze green; the finals and lettering are finished in gold leaf, all very neatly and tastefully done by Mr. T. M. Smith.

The whole design and its execution is most creditable to Mr. Rod Mitchener and surely Mr. Churchill deserves the warmest thanks of the community for his thoughtfulness in this caring for God's Acre, where rest our sacred dead, in this showing a good example worthy of imitation in many other places.

In this connection we have endeavoured to get information from some of the older residents, A correspondent writes -

"Taking in the limits of Incorporation as they are to day, the land which is now the cemetery was formerly owned by two residents, Edward Barker and James Mitchner. Then there was a dividing line running through what is now the incorporated limit of Hantsport. This line ran in a south east direction to the Halfway river bank and north west to the Kings County line. Edward Barker owned the land on the south west side as far as what is called the Holmes Hill, containing one hundred acres. James Mitchener owned the land on the north side to the Avon River bank which also contained 100 acres and which he afterwards sold to Asa Davison.

"The late Ezra Churchill purchased from Edward Barker the land which now comprises the cemetery. There was, it is said, a reservation of land for the cemetery but whether by Edward Barker or Ezra Churchill people are not certain. However no deed was given or papers to that effect. James Nunn, a shipwright bought a portion of the land from Mr. Churchill where the cemetery is located. After a time it changed hands again. Dr. E. L. Brown of Wolfville, becoming the owner, who was also Hantsport physician at that time. When the doctor examined the papers, he found that he owned the land where the cemetery is located. The people of Hantsport subscribed enough to secure the reservation, and got a deed of it from Dr. Brown, with a right of way with a road thereto and an additional piece was donated which was afterwards added to by a gift of land from Messrs. George and J. W. Churchill.

The first burial in the cemetery was in 1834 when the remains of Ezra, son of Capt. Michael Mitchener were interred. The casket was made by Ezra Churchill. For a number of years there was not very much system as to where interments were made, persons making their choice of a spot which suited them without regard to walks or points of compass, which made it a little difficult when the decision was made to have the grounds properly laid out into lots and walks. This cemetery, with a little time spent on it each year could be made one of the prettiest burial places in the province. Charles Solomon was caretaker for a number of years, but since his death a successor has not been appointed.

Mr. J. W. Churchill has at present some men at work grading the road to and around the cemetery and removing the fence from the north side where the Churchill estate has recently given another piece of land to enlarge the cemetery grounds.

SURVEY OF HANTS PORT  
RIVERBANK CEMETERY

Allen Robertson  
May 1979

Hantsport Riverbank Cemetery was established in the late 1830's. Not until the 1840's did it become the main burial ground for the growing community at the head of Halfway River; alternatives were in Lockhartville, Mt. Denson and a couple of private family grounds. Located along the bank of the river, the land changed hands several times, eventually being sold by the Churchill family to Dr. Brown - when the deed was drawn up, he discovered that he had acquired the cemetery. The local people raised money and purchased the burial ground. It has been maintained by the town to the present day.

The earliest surviving monument now (1979) existing is dated 1841 (Section II, #30); many stones for the 1840's and 1850's still stand. The community of Hantsport (incorporated as a town 1895 April 25) was founded by Edward Barker 1789; the growth in population began in the 1840's,

1850's with the rise of the shipbuilding era in the settlement. Interred at Riverbank are many members of the founding families; master mariners are numerous. Ezra Churchill, major shipbuilder and Canadian senator, lies buried in the Churchill family plot (Section I). Also laid to rest here is Rev. Silas T. Rand, Baptist minister and Micmac missionary. Several monuments mark the graves of persons in their nineties, and of one centenarian (prior to 1930) - Mrs. Mary Dorman, d. 14 Sept. 1915 ae. 103 yr. (Section II)

This survey of the Riverbank Cemetery is a record of monuments dated 1930 and earlier. Some dates beyond this period are noted - this occurs in cases of added inscriptions to old monuments, and in a few instances where the exact date of the stones' erection is either side of 1930. The cemetery has been divided into eight sections, each with its own numbering ; (all stones have been numbered, including those of post-1930 date, in order to facilitate location should one wish to see them.) Names have been grouped alphabetically. Included is a main map showing the cemetery's divisions; each section is preceded by its own map. Wording has been recorded 'as is' (except for these abbreviations : ae. - aged; yr(s) - years; mth. - months; d. - died)

Original survey done 1973; all stones rechecked 1979.
